## REPORT OF THE SCHOOL BOARD

---

For the year ending February 15, 1905, there have been three hundred and thirty weeks of school, giving thirty weeks each to the several districts.

The wages paid the teachers average about six dollars and sixty three cents per week, deducting the amount they have to pay for their board and making allowance for the number of weeks they are not under pay as teachers leaves them a less price per week than any other employment. With two or three exceptions the teachers have been those of experience. The school board feels that our schools compare favorably with those of other towns in all respects. Pupils who have gone to academies and high schools from this town have been complimented upon their fitness to enter the regular four year course. It does seem that if a greater interest was taken in the schools by the parents and shown by their more frequent visits in the schools there might be yet a greater improvement. A parent's presence in the school will give them information at first hands, not distorted by prejudice and a child's idea of what constitutes a good teacher. We must also remember that the text-books are not like those of twenty or forty years ago; they have to be used in the hands of the teacher and the pupil, in a different manner than when "we went to school." The home influence upon the pupils prepares them to aid or hinder the influence and work of the teacher to a greater degree than is usually acknowledged. No one realizes this more than the teacher, unless it may be the school board. Take a

greater interest in the schools; stand by them and by the teacher. In this way you also help the pupils.

The school board wishes to express their appreciation of what has been done in this line and to urge upon all patrons of the schools more of the same.

Respectfully,

PAYSON E. FAIRFIELD,	}	School Board
